## Protegent Total Security Solution

"Think Beyond Anti-Virus, Think Protegent"

Protegent is deciphered from French Word "Protégée", which means "TO PROTECT". As the name suggests Protegent products have been designed to protect your Business, child, data and computer/Laptop.

Protegent Total Security with its two tier protection has been designed to protect computer system from all kind of viruses, spy-wares, mal-wares, root-kits and protects incoming and outgoing data. It also provides option to prevent your important data from loss. There are several unavoidable conditions which lead to data loss. Data loss creates such bad condition that we need to go for data recovery, but there is no guaranty for complete data recovery. But with the help of our "crash Proof"- data loss prevention software you can get your data back as it was.

Components

- **Protegent Total Security**
- **Crash Proof -** Data Loss Prevention

Total Security

Protegent Next Generation Technology helps to detect new threats based on file and URL reputation. It extends beyond malware protection and provides comprehensive security against online threat to your computer. Known for its concrete protection against malware, phishing attacks and spam, Protegent Total Security Solution encompasses features like antivirus, parental control, bi-directional firewall and spam filter to protect your system from cyber threats. Unknown suspicious samples are collected and automatically processed to your our cloud Protegent™ system. If a sample is found malicious, automated signatures are generated and immediately rolled out. This blocks unknown threats before they impact your pc and improves the overall efficiency to detect.

Key Features

- Smart Code Emulations.
- USB Threat Protection.
- Zero day Malicious URL Protection.
- Anti -Ads Protection
- Anti Phishing Protection.

Benefits

- Protection against Adware/PUP (potentially unwanted programs).
- Low Foot Prints
- Time Restriction.
- Parental Control.
- Speed up your PC.

Detailed Descriptions

Smart Code Emulations	Protegent strength lies in proactive detection of known and unknown threats by means of complex definitions of malicious behavior by using Smart Code Emulation signatures & neural networks. A single signature can detect and block thousands of known and unknown threats before they emerge. There entire process is done without any impact on your system resource.
Firewall/Web Filtering	Protegent lightweight Firewall checks against reputation and granular URL category databases ratings for WebPages, IP's, domains and keywords. It contains millions of unique web sites which are broken down into 100+ categories. The lightweight firewall web page analyzer is the best protection against inappropriate content without any lag or delay in web surfing. It generates a warning message "Blocked", if users get access some phishing websites.
Anti-Ads Protection	With Protegent anti-ads protection, most of the Ads are blocked and removed before data is downloaded to your computer. This helps to increase faster uploading & downloading and thereby saving your bandwidth.
Anti Phishing Protection	Protegent encourages online shopping and provides protection against fake phishing sites. Protegent anti-phishing adds one more layer of protection. When a user's computer attempts to access a URL, it will be compared against DenySense.net system of known phishing sites. If the fake url is found, connection to the URL is aborted and a warning message "blocked" is displayed. Our database contains millions of phishing websites and is regularly updated. With Protegent™ you are protected from scams with more comfortable and safer online shopping.
Protection against Adware/PUP (potentially unwanted programs)	Protegent take down all Adware/PUP's which overloads your pc and compromise your privacy. Protegent Threat Research team is continuously tracks growing numbers of Adware/PUP's. There are several types of signature definitions to detect the outnumbered Adware/PUP's which uses our built in technology of Smart Code Emulations and other sources like sample

	exchange or active honey pots.
Hourly update	Protegent Antivirus software is updated every hour and protects our system from new viruses.
Low Foot Prints	Newly created signatures are packed together and regularly released to our users in the form of a Threat Signature Foot Print DB Update. These updates are rolled out on an hourly basis, 24-7-365 days which keep Protegent up-to-date.
Time Restriction	Time restriction control your children time spent on web surfing. You can take complete control by allowing or blocking full internet access or based on each categorization.
Parental Control	Safe guard your kids from access to inappropriate Internet websites content & cyber bullying based on content categories, such as Porn/Adult. It becomes a perfect Parental Control tool.
Zero day Malicious URL Protection	Malicious URL Protection provides another layer of protection against command and control, botnet's and suspicious links. If any malicious URL communication is detected, the communication is aborted and a warning block message "blocked" is displayed to the user.
USB Threat Protection	Protegent malware team has implemented Neural Smart Scan which protects system from unknown USB threats. When a USB is infected with malware, it usually creates short cuts and hides the data inside it. Protegent has adapted to a different and advanced approach to clean such infected USB drives.
Speed Up Your PC	Forget system slowdown situations with bloat ware products. With Protegent™ Speed always Thrills! We build what you always need, very light on your system resources and you don't even notice it's running in the background & protecting you.
Setting Protection	Protects your Protegent settings with a password, so that no one can change or modify the settings even if the other user has the admin rights.

Crash Proof

Crash Proof is proactive data recovery software that helps users to recover/restore any lost data/files in a matter of time. This software is designed to keep the images of the file indexes/ disk properties and keeps on updating them at regular intervals. In this business /organization world the data volume has raised so much that computer dependency has reached to high. As the dependency grows, downtime increases as well. The reason for increase in downtime is due to data loss which cost us more than the recreation cost. Data recovery doesn't provide you satisfactory result every time. So the users have requirement of software that can help users to keep the image of the data. Crash proof takes the image of your data on regular intervals and this information is stored in a protected area. Crash Proof uses these images to track the lost/deleted files. Users can recover their lost files with the help of this software and can un-format any lost drive.

Features:-

Deleted file/ folder recovery	This software supports deleted file /folder recovery. It can recover the deleted/ lost files if they are deleted from your PC even if they are not present in recycle bin.
Unformat formatted drives	The software can even unformat the whole drive. With the help of this product the user can revive the file system from its replica, which is stored in some other location of the hard disk.
Repair Corrupted / Deleted Partition	With this software you can repair or build back the corrupted/ deleted partition, which may occur due to virus attacks or accidental deletion.
Revive incase of FAT/MFT Corruption.	The software has a feature to build back your FAT/ MFT file system. It supports 100% recovery in case your file system gets corrupt.

System Requirements

Processors

Intel or AMD x32 – x64

Supported Operating Systems

Windows XP (SP 3), Vista , Windows 7, Windows 8, 8.1 & 10

Net Framework 2.0

Required for Network Update server

Memory Consumption

40 MB

Free Disk Space

120 MB

Experience a brighter tomorrow ………………………..Today
