

Protegent Anti Virus Solution

The word “Protegent” is originated from a French word “Protégée”, which means is “To Protect”.

Our award-winning Anti-Virus with its two tier protection removes malware and protects you against the latest strains of viruses, worms, Trojans and more. **“Designed to go unnoticed – because great protection doesn't hamper your way or slow you down”** It not only keeps your PC clean, it also enhances your privacy and empowers you to safely surf the web. It also provides the option to prevent your important data from loss. In today's world data loss is a common problem which creates issues so we need to go for data recovery but there is no guaranty to recover the complete data, but with the help of our “crash Proof” data loss prevention software you can get your data back as it was.

Description & features of Protegent Anti-Virus Solution

Our prime Moto is to stop viruses before they even reaches to your PC. We scan your files before you open them, your Facebook links before you click your email before it gets to you and your websites before you visit them.

One click button Removal tool – for all kind of malware	Now you can use the Protegent Antivirus, highly qualified VB100 against Virus, Trojan, Spyware, Worm, and other forms of computer threats.
Pro-active protection against any form of computer threat	The pro active protection of the Host allows you to control and block the most recent penetrations techniques and the manipulation of the personal data. Protegent Antivirus allows you to “act in advance” blocking all threats that could cause damages on your PC. Without need to wait for the official update.

Anti-Theft System	Now your personal information cannot be stolen anymore! Thanks to the Block ID function, the data of the credit card, the password, and other critical data are stored in a “special place” that prevents the accidental or intentional spreading. It is also possible to define a list of trusted sites.
Navigation without fear	Internet never has been so safe! The continuous updating of the black list allows you to navigate and to explore the Web in full peace and no emergency. Protegent Antivirus removes suspicious and ambiguous web sites and it prevents the access to the sites of phishing.
Always active Protection	Protegent Antivirus cannot be disabled or blocked from external attacks. Thanks to the solid protection of all its components, Protegent Antivirus do not allow any form of unauthorized deactivation or the closing of the active protection from an external or internal attack.
No Slow Down	Protegent Antivirus allows you to maximize the operating performance, decreasing the amount of utilized resources. The software is optimized in order to offer high speed of analysis and immediate answer to the attacks, leaving the user free to operate in full peace and calmness.
Anti-Leak	Prevents suspicious activity to block unknown threats and prevent data leaks.

Crash Proof software helps the user to keep the updated backup of the data. This software designed to keep the images of the file indexes/ disk properties and keeps updating them at regular intervals. In this business /Organization world the data volume has raised so that computer dependency grown. As the dependency grows the down time increase as well due to data loss and the data lost cost us more than the recreation cost. Data recovery cannot provide you the satisfactory result every time. So the users have the requirement of software that can help users to keep the image of the data. Crash proof takes the image of your data in a regular interval and this information stored in a protected area. So the users use that data as per their need. You can recover your lost files due to help of this software and you can un-format any lost drive.

Features:-

Deleted file/ folder recovery	The software supports deleted file /folder recovery. It can recover the deleted/ lost files if they are deleted from your PC , even if they are not present in recycle bin.
Unformat formatted drives	The software can even unformat the whole drive. With the help of this product the user can revive the file system from its replica, which is stored in some other location of the hard disk.
Repair Corrupted / Deleted Partition	With this software you can repair or build back the corrupted/ deleted partition, which may occur due to virus attacks or accidental deletion.
Revive incase of FAT/MFT Corruption	The software has a feature to build back your FAT/ MFT file system. It supports 100% recovery in case your file system gets corrupt.
